

# Herbicidal compositions for tolerant or resistant maize crops

Herbicide combinations (A)+(B), if appropriate in the presence of safeners, with an effective content of

- (A) broad-spectrum herbicides from the group
  - (A1) glufosinate (salts) and related compounds
  - (A2) glyphosate (salts) and related compounds such as sulfosate,
  - (A3) imidazolinones,
  - (A4) herbicidal azoles from the group of the protoporphyrinogen oxidase inhibitors (PPO inhibitors)
  - (A5) cyclohexanedione herbicides and
  - (A6) heteroaryloxyphenoxypropionic acid herbicides

and

- (B) one or more herbicides from the group of the compounds consisting of
  - (B0) one or more structurally different herbicides from the abovementioned group (A) or
  - (B1) foliar- and soil-acting herbicides against monocotyledonous and dicotyledonous harmful plants or
  - (B2) herbicides which can be employed selectively in maize against dicots, or
  - (B3) foliar- and soil-acting herbicides which can be employed selectively in maize, predominantly against dicotyledonous harmful plants,
 or herbicides from several of groups (B0) to (B3)

are suitable for controlling harmful plants in maize which consists of tolerant or resistant mutants or transgenic maize plants and the maize crops are tolerant to the herbicides (A) and (B), if appropriate in the presence of safeners, which are contained in the combination.
